HDMS Showcases DART Healthcare Analytics Reporting at 2010 User Forum

Lowe's and Health Care Service Corporation Honored with 2010 Innovator Awards

Health Data & Management Solutions (HDMSSM) held their 6th Annual User Forum in Las Vegas October 24th - 27th, 2011 to provide HDMS customers and prospects an opportunity to attend a variety of sessions focused on healthcare analytic reporting using HDMS DARTSM —Data Analysis and Reporting Tool.

The HDMS DART web-based application is an easy-to-use online gateway to healthcare reporting and data analysis. This comprehensive, web-based application provides health plans, employers, and brokers/consultants with access to their healthcare data via any Internet connection – delivering the powerful tools needed to analyze and detect trends and opportunities, and reduce costs while increasing efficiencies.

In addition to presentations delivered by HDMS clients, conference participants also heard about the latest release of DART as well as the newest web-based applications Catapult, ForecastSM, and CareShieldSM. DART provides expanded graphing capabilities and includes mapping, dial, and bar/line combination charting, dashboard reporting, and expanded filtering capabilities. Along with significant end user experience enhancements, the technical infrastructure was significantly upgraded.

As part of the user forum, HDMS also recognized both Lowe's and Health Care Service Corporation (HCSC) with the 2010 Innovator Award. Lowe's was honored for their strong use of DART to support Life Track, an integrated leading edge health and wellness program, as well as fully integrating DART into the administration of their health and wellness programs. HCSC received the Innovator Award for their strong collaborative approach to guiding the vision and development of HDMS Catapult and their strong utilization of HDMS ERRPSM. HCSC used ERRP to provide a self-service option to their accounts to access data to support Early Retiree Reinsurance Program participation. Michelin received honorable mention for their strong collaboration with HDMS and use of the DART tool suite.

About HDMS

Health Data & Management Solutions, Inc. (HDMS) is a software development company offering data warehouse, management and analysis tools for the healthcare industry. HDMS' web-based products and services provide flexible, high value reporting, empowering both employers and health plans to maximize the value of their healthcare data and support benefit decisions.
