For Immediate Release

CHICAGO, Illinois—December 20, 2010

HDMS Announces the Release of CareShield

Health Data & Management Solutions, Inc. (HDMSSM) announces the release of CareShieldSM, a solution that applies evidence-based quality measures to HDMS DARTSM health care data to identify gaps between observed patient care in compliance with treatment guidelines.

CareShield integrates clinically relevant scientific research about effectiveness of various treatments in making decisions about the care of the individual patient. This solution can be applied to improve physician compliance with treatment guidelines and member compliance with prescribed treatments in order to improve clinical outcomes. CareShield reports provide detailed information on patients needing services for possible intervention. Guideline compliance also can be measured across population segments, providers, groups, clinical conditions, and many more units of analysis.

About HDMS

Health Data & Management Solutions, Inc. is a software development company offering data warehouse, management and analysis tools for the health care industry. Our web-based products and services provide flexible, high value reporting, empowering both employers and health plans to maximize the value of their healthcare data and support better decisions.
