For Immediate Release

CHICAGO, Illinois—December 8, 2010

HDMS Announces the Release of Catapult

Health Data & Management Solutions, Inc. (HDMSSM) announces the release of Catapult, the next generation of extensive interactive reporting capabilities.

Catapult was designed as a complement to standard sets of reports that require automatic generation, scheduling and delivery to key constituents. This distributed reporting solution addresses the full spectrum of report generation and delivery requirements—from basic metrics reporting to parameter-driven reporting.

Catapult enables the ability to schedule reports to automatically generate on a recurring basis; generate multiple and large reports on-demand; apply parameters to generate HDMS ArrowSM targeted reports, which include selected chapters, customized date ranges, and data subsets; and schedule “flash” reports delivering timely information ahead of the DARTSM database update.

About HDMS

Health Data & Management Solutions, Inc. (HDMS) is a software development company offering data warehouse, management and analysis tools for the healthcare industry. HDMS' web-based products and services provide flexible, high value reporting, empowering both employers and health plans to maximize the value of their healthcare data and support benefit decisions. For more information, visit www.hdms.com.
