

## ICD-10 and 5010 Transaction Standard Preparedness

This document describes high level steps and timeline for HDMS's ICD-10 and 5010 transaction standard preparedness.

### On-going Assess Third Party Vendor's Readiness

We are monitoring and assessing our third party vendor's readiness for ICD-10 transition on an on-going basis.

### March 2011 Complete Assessment of Version 5010 and D.0

Our goal is to complete the impact assessment of the new version 5010 and D.0 electronic transaction standard for institutional, professional and pharmacy claims by March 2011. During this process we also will be looking to identify additional analytical opportunities that will be available with the transition to the new version.

### July 2011 Complete Client Interview

We plan to complete the client interviews by mid 2011 in order to understand how their data is changing with the transition to the new version of the electronic standard and ICD-10.

#### We would identify:

- How clients are planning on implementing ICD-10.
- What their internal timeline is for 5010 transition.
- How their file layouts are changing for input and/or output files.
- Additional fields that clients would be interested in using from the new version.
- 90 to 120 days lead time will be required to incorporate file layout changes.

### December 2011 Complete Detailed Assessment

We plan to complete the detailed assessment of all the code and logic changes to DART processes by the end of 2011.

#### We would identify:

- Processes and places where ICD-9 diagnosis and procedure codes are being used
- Changes to DART data formats and inputs
- Impact of changes to inputs into various third party softwares
- The best strategy for integrating ICD-10

### June 2013 Complete Coding and Process Changes

We plan to complete the updates to internal codes and processes to accommodate ICD-10 by June 2013.

### October 2013 Begin Accepting ICD-10 Codes

We plan to be ready to accept ICD-10 codes by October 2013 go-live date.

### Key Dates

#### January 1, 2012

Compliance with version 5010 transaction standard

#### October 1, 2013

Compliance with ICD-10 code sets
