HDMS provides fully managed health data and analytics-based solutions.

Originally incorporated in 2000, HDMS is now one of the CVS Health family of companies.

We design, build, and operate dynamic data environments which serve constantly evolving analytic and reporting needs. We are known for solution flexibility, enriched data, and an intense focus on data quality, privacy and security.

Our clients include:

Health plans
Carriers, TPA's,
Benefits Administration Firms

Plan sponsors
Employers, Unions, State and Local
Government Entities, Coalitions

Benefits advisors
Advisory Practices,
Consulting Firms

Provider communities
Large Healthcare Providers,
Accountable Care Organizations

Whole health and well-being insights

HDMS connects and enriches Member 360° data, for whole-health insights.

Integrate information from claims, biometric sources, wellness point solutions, and more.

Connected health views surface unique insights. Use for targeted actions that drive strategic cost reduction, performance optimization, and improved outcomes.

HDMS is bigger than you may know!
We are the team behind many strategic digital
solutions that underpin CVS Health industry innovation.

Fully managed solutions

Technology is only part of the solution. It's people who bring it to life. That's why each HDMS solution includes a service model. Lean on us for daily operations, clinical or analytic expertise, and extra resources to execute new analytic projects. Your team focuses on acting upon new insights, not the tedious data work to create them.

HDMS service teams manage each implementation across

- Source data lifecycle management
- Information integration, transformation and enrichment
- Rich analytic content design, intuitive data visuaizations
- Tailoring user interfaces as business needs evolve
- Exceptional security, rated by award-winning third-party security monitoring vendor

Why use analytics?

Help people: Improve member engagement, satisfaction, and health.

Work strategically: Drive operational effectiveness and cost management.

Manage investments: Measure program & financial performance

HDMS delivers delightful customer service experiences with hands-on teams that drive personalized Analytics Agendas.
