HDMS® Health Data
& Management Solutions

Fully managed health data and analytics-based solutions

Originally incorporated in 2000, HDMS is now one of the CVS Health® family of companies.

We design, build and operate dynamic data environments which serve constantly evolving analytic and reporting needs. We are known for solution flexibility, enriched data and an intense focus on data quality, privacy and security.

Whole health and well-being insights

HDMS connects and enriches Member 360° data, for whole-health insights.

Integrated information from claims, biometric sources, wellness point solutions, and more.

Connected health views surface unique insights.

Used for targeted actions that drive strategic cost reduction, performance optimization, and improved outcomes.

Our Clients Include:

Health Plans
Carriers, TPAs, benefits administration firms

Benefits Advisors
Advisory practices, consulting firms

Plan sponsors
Employers, unions, state and local government entities, coalitions

---

Provider Communities
Large health care providers, accountable care organizations

HDMS is bigger than you may know.

We are the team behind many strategic digital solutions that underpin CVS Health industry innovation.
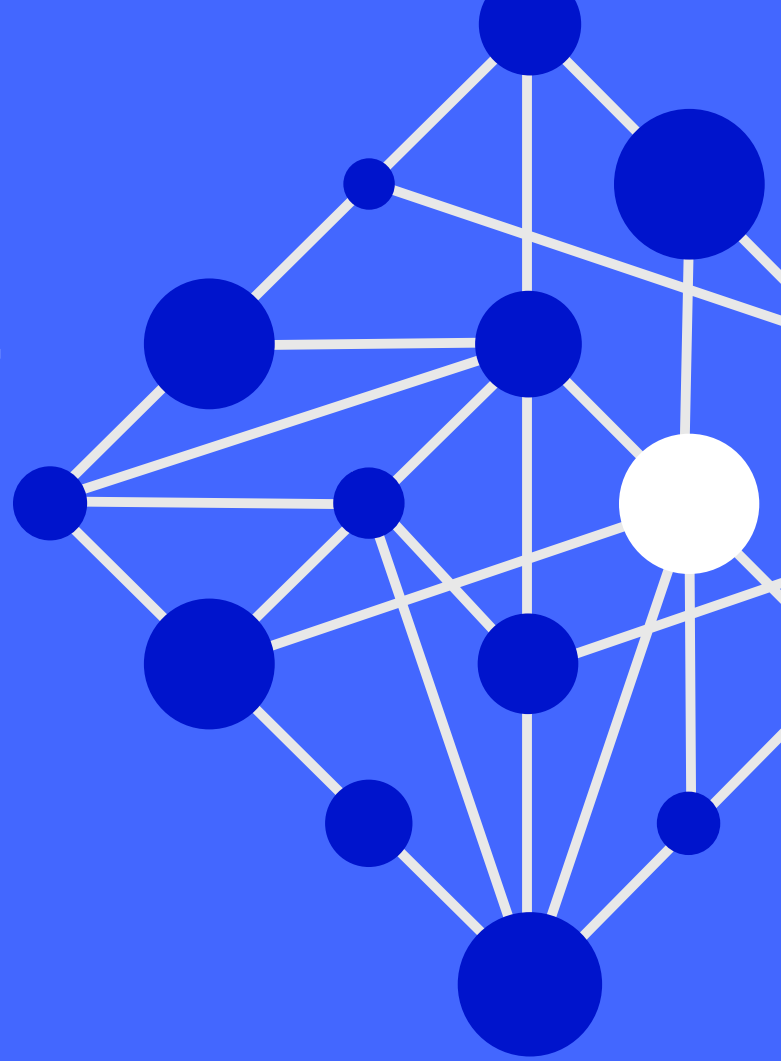

Top reasons organizations invest in HDMS:

1. Strategic benefits design
2. Plan design
3. Evaluate point solutions
4. Plan sponsor reporting
5. Identify and manage cost savings opportunities
6. Provider quality and performance
7. Network analysis
8. Population health and SDoH
9. Predictive analytics
10. Executive updates

HDMS Enlight™

Fully managed solutions

Technology is only part of the solution. It's people who bring it to life. That's why each HDMS solution includes a service model.

Lean on us for daily operations, clinical or analytic expertise, and extra resources to execute new analytic projects.

Your team focuses on acting upon new insights, not the tedious data work to create them.

HDMS service teams manage each implementation across:

Source data
life cycle management

Information integration,
transformation and enrichment

Rich analytic content design and
intuitive data visualizations

Tailoring user interfaces as
business needs evolve

Exceptional security, rated by
award-winning third-party
security monitoring vendor

HDMS delivers delightful customer service experiences with hands-on teams that drive personalized analytics agendas. Contact us to find out more at HDMS.com/contact-us
